

GoTo Cuts Security Questionnaire Response Time in Half

GoTo provides clients with secure, remote access to their computers, files, and applications from any device at any time. Its platform supports tens of millions of daily users and is in demand by companies of every size.

With cybersecurity top of mind in today's world, GoTo is faced with in-depth security questionnaires from prospective clients. The sales teams spent half of their time just answering these questionnaires, which was not sustainable in the face of expanding demand for collaboration and communications solutions.

CHALLENGE

Constant Updates:

Product growth combined with frequent software updates made a spreadsheet system unscalable across thousands of clients.

Outdated Versions:

Old and incorrect content often sent the sales team into damage-control mode.

Re-Inventing the Wheel:

Without a single source of approved content, all responses had to be reviewed by subject matter experts, repeatedly.

SOLUTION

Automated Updates:

Content is pinpointed and updated in real-time, all in one location

Full Version History:

Controlled access to all versions of previous responses ensures consistent, compliant delivery every time

Global Resource:

Team can access and collaborate in a single curated library of all authorized content 24/7 from anywhere.

Ombud reduced response time by more than half, enabling our sales team to close more business.

-Mike Bettencourt,
VP of Solutions Consulting

RESULTS

GoTo now maintains a centralized, curated library of automatically updated, management-approved security information that ensures consistent, compliant material shared across its enterprise.

One Single Employee

now equals 150 questionnaires per quarter.

150% Increase

in response volume with 0% staff increase.
